SUMMARY

Results-driven Full Stack Developer with 4+ years of experience architecting scalable web applications and enterprise-grade CRM solutions. Highly proficient in full-lifecycle backend and frontend development using PHP, Laravel, Node.js, Express, MongoDB, EJS, and WordPress. Adept at cross-functional Agile collaboration, seamlessly integrating REST APIs, and driving system performance optimizations. Actively leverages AI automation tools to architect cross-platform mobile applications with React Native, dramatically accelerating development workflows and delivering high-impact solutions for diverse client ecosystems.

EXPERIENCE

DIGITALLY BIRD PVT. LTD.
Senior Full-Stack Engineer

Sep 2024 – Present
New Delhi, India

- Spearheaded the development of multiple enterprise-grade CRM platforms ([staff.digitallybird.com](#), [crm.nvsledwall.com](#)) and high-traffic ecosystems ([basi6direct.com](#)), architecting databases to securely process and manage massive datasets of 100,000+ records with zero downtime.
- Engineered robust, highly scalable backend environments utilizing PHP, Laravel, and Node.js, optimizing server-side routing and significantly reducing application load times by 40%.
- Integrated advanced automation and intelligent coding workflows to accelerate development cycles by 25% and deliver high-performance solutions.

FREELANCE FULL-STACK DEVELOPER — WEB, MOBILE & CRM
Lead Freelance Developer

Dec 2022 – Present
New Delhi, India

- Architected end-to-end cross-platform applications for enterprise and government clients, leveraging AI-integrated workflows to manage scalable backend infrastructure, secure payment gateways, and accelerate development cycles by 30%.
- Delivered key platforms including **Secure Fencing** (B2B application featuring multiple business-specific calculators), **Rishy** (location-automated health tracking app for DIPAS DRDO), and **Bharatwani** (SaaS CRM for automated WiFi monetization).

GRAPHICS GREEN INDIA PVT. LTD.
Full-Stack Developer

Sep 2023 – Sep 2024
New Delhi, India

- Built and maintained highly available full-stack web applications using the MERN stack, integrating robust backend logic with dynamic EJS templating engines to increase content rendering efficiency by 40%.
- Collaborated in Agile cross-functional teams with effective communication to ship solutions 15% faster, ensuring high code quality and reducing production bugs by 15%.
- Leveraged REST APIs to establish seamless data communication between frontend interfaces and database architectures, improving system efficiency by 20%.

AURUM LABS
Full-Stack Developer

Jan 2023 – Sep 2023
New Delhi, India

- Designed and developed responsive HTML/CSS mailers and dynamic web assets, optimizing digital marketing funnels to increase user engagement metrics by 20%.
- Deployed custom backend features for business infrastructure websites utilizing PHP and Node.js to satisfy specialized client specifications, successfully maintaining 99.9% uptime.
